

ELECTRUM

OBELISCO ESTATE

Electrum is an alloy of gold, silver, and other trace metals. It was crafted into coins and jewelry, and carefully layered on the pyramidion at the top of the Pharaoh's obelisks where it reflected the sun in honor of the sun god Re. This wine, named after the alloy of the gods, is a blend like the metal - Cabernet Sauvignon (gold), Merlot (silver), Malbec (copper). The hand-picked fruit from the estate's best lots has been crafted and aged in new French oak into a distinctive blend that represents the finest expression of Obelisco Estate.
